Updates where it matters most

Timeless Scandinavian design, smooth handling, and a new, more intuitive free-standing display give the new XC90 7-seater SUV an elegant edge with enhanced ride comfort.

Volvo premium upholsteries

Exclusive ventilated Nappa leather seat upholstery with a smooth, natural touch and a warmer look.

The front seats are ventilated with perforation and built-in fans to further enhance comfort during long drives and in warm weather.

Cardamom ventilated Nappa leather in charcoal/ cardamom interior with Brown Ash décor

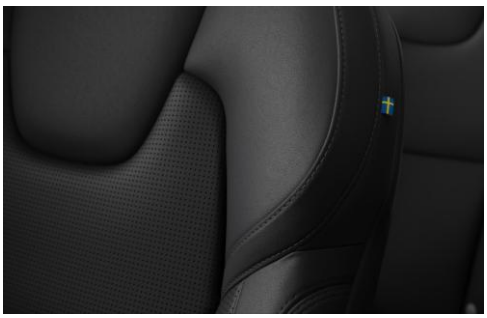

Exclusive ventilated cardamom Nappa leather seat upholstery with a smooth, natural touch and a warmer look in a subtly contrasting charcoal/cardamom interior with charcoal headlining, cardamom textile door panel inserts, contemporary Brown Ash decor and crystal gear shifter by Orrefors® for a crafted, timeless expression of dynamic style.

Blond ventilated Nappa leather in blond/charcoal interior with Grey Ash décor

Exclusive ventilated blond Nappa leather seat upholstery with a smooth, natural touch in a contrasting blond/charcoal interior with blond headlining, contemporary Grey Ash decor, crystal gear shifter by Orrefors® and a dual-tone tailored sport leather steering wheel for an airy, elegant ambience inside the car.

Charcoal ventilated Nappa leather in charcoal interior with Grey Ash décor

Exclusive ventilated charcoal Nappa leather seat upholstery with a smooth, natural touch in a charcoal interior with blond headlining, contemporary Grey Ash decor and crystal gear shifter by Orrefors® for a crafted, timeless expression of dynamic style.

Head-up display

The head-up display presents vital driver information so it appears in your field of vision at a distance that's comfortable for your eyes. You can keep your eyes on the traffic at the same time as you see actual speed, speed limits, navigation directions and more. You don't have to change focus or look down, which gives less strain on the eyes.

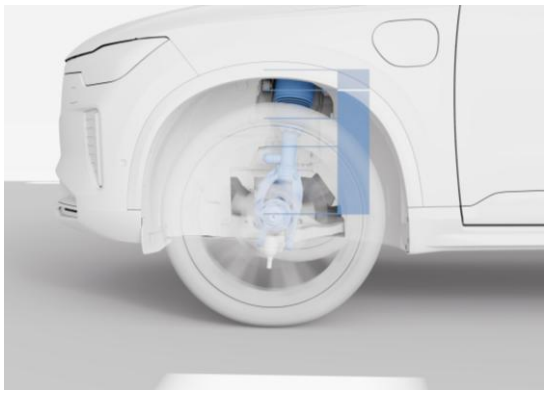

Pilot Assist

Pilot Assist gives smooth, intuitive driving from standstill up to motorway speeds. It helps you maintain a safe distance from the car in front by adapting your speed while helping to keep you centred in the lane by making small steering adjustments. In stop-and-go traffic, your car can follow the car ahead and brake automatically to a standstill when needed.

Matrix-design LED headlights

The new generation advanced Matrix-design LED headlights in slim, T-shaped signature design give a wide and long light pattern for optimised vision in all conditions and smooth light transitions. The headlights can identify an oncoming road user and can adjust the light image with high precision to give the best possible light without dazzling others.

Air suspension with active chassis

The new XC90 has air suspension system on all four wheels which further improve comfort and ride compared to traditional coil springs. The air suspension also provides self-levelling functionality and speed dependent ride height adjustment. The electronically controlled damping system (Four-C) replaces traditional dampers and constantly adjusts important chassis parameters. This technology monitors the car, road, and driver 500 times per second.
